

Crohn's Disease and Vitälzým Testimonials

CROHN'S DISEASE

I am writing this letter in praise of your product – Vitälzým. Two friends with “Fibromyalgia” and bad muscle pain with NO RELIEF from conventional western (chemical) mediation recommended this product to me.

Taking Vitälzým, in less than one month, my pain has decreased by 80%!! Thank GOD!!

At this point I want to say - I had horrible chicken pox at age 7. There was not a place on my body that I didn't have pox, including in my mouth. (And now I believe in my intestines.) However, no one would believe me! From age 8 years old and on I have had nothing but trouble with my digestive system! - How SAD!

I must have gone through 14 upper G.I. tests for ulcers (When you drink Barium) until they did a lower G.I. Test. The results were Crohn's Disease w/ bleeding. (1983 - 1984)

Just to back up a wee bit - In the 70's, had my gallbladder removed - Passed two stones, very painful! Also had been on thyroid meds for a long time.

Stopped seeing doctors until 1988 with an eye problem (Found out it was related to Crohn's Disease.) Went to see a G.I. Specialist who then put me on Sulfa Drugs (Wouldn't take Prednisone) and a colonoscopy every year.

In 1996 I was diagnosed with Rheumatoid Arthritis and Fibromyalgia. Got off of chemical Meds and went to alternative Meds - But could never find anything to help or last for the Fibromyalgia until the Vitälzým!

Thank you for this wonderful product.
